

## Products, Markets & General Information

### Description

CAS Medical Systems, Inc. (CASMED) is a full service medical device company that is dedicated to the development and manufacture of innovative, non-invasive monitoring solutions vital to patient care.

### Headquarters

44 East Industrial Road, Branford, CT 06405, USA  
www.casmed.com

### Manufacturing

44 East Industrial Road, Branford, CT 06405, USA  
14476 Duval Place West, Suite 303, Jacksonville, FL 32218

### Markets and Products

CASMED provides top-quality products to hospitals, emergency medical services, home care providers and original equipment manufacturers (OEMs).

- **Bedside Monitoring**  
A full line of non-invasive monitor platforms for a variety of clinical applications. Ideal for sub-acute hospital areas such as med/surg units, recovery, procedure labs, physician offices and emergency response settings. A wide variety of measurement parameters including CASMED MAXNIBP<sup>®</sup> (non-invasive blood pressure), Masimo<sup>®</sup> and Nellcor<sup>®</sup> pulse oximetry, Covidien thermometry, ECG, Oridion end-tidal CO<sub>2</sub>.
- **Critical Care Monitoring**  
The FORE-SIGHT<sup>®</sup> Absolute Cerebral Oximeter delivers absolute measurement of cerebral tissue oxygen status. This information provides immediate feedback on patient condition, allowing clinicians to intervene if necessary to avoid injury to the brain that can be caused by lack of oxygen.
- **OEM Non-Invasive Blood Pressure Technology**  
MAXNIBP is the most advanced technology for non-invasive blood pressure measurement. This technology is sold for use in other manufacturers' multi-parameter patient monitors for a wide range of clinical applications.
- **Supplies & Service**  
A full line of disposable and reusable non-invasive blood pressure cuffs; disposable and reusable IV infusor cuffs; specialty products designed for premature infants and their unique sensitive skin requirements.

## **Employees**

150 employees in CT and FL facilities.

## **The CASMED Difference**

A small, efficient and entrepreneurial company, CASMED has grown steadily since its inception, reaching sales of \$41 million in 2008. This remarkable track record is a result of sound business strategies and the dedication of our exceptional staff.

## **Background**

CASMED was founded in response to the medical community's expressed need for a device that could obtain fast, accurate blood pressure readings in newborns. In 1974, CASMED introduced the first blood pressure cuff designed specifically to meet the challenges of neonatal monitoring. In 1984, the company established its headquarters in Branford, CT, and officially incorporated as CAS Medical Systems, Inc. In 2005, the company purchased Statcorp, Inc., a BP cuff manufacturing facility in Jacksonville, FL. Through the years, our product offerings continue to evolve and expand, always focused on areas vital to patient care. Most recently, in 2007, our FORE-SIGHT cerebral oximeter was introduced to measure absolute oxygen saturation levels in the brain, and promised to lead to major advances in non-invasive diagnoses and individualized patient care.

## **Our Philosophy**

CASMED is committed to meeting the needs of our customers and their patients, while continuing to build a dynamic, profitable enterprise. Everyone at CASMED is committed to the highest standards of innovation, quality, service and performance. We simply will not settle for less.
